## Profile

---

As an enthusiastic and driven individual seeking an internship in software engineering, I bring a solid foundation in frontend development coupled with a keen desire to expand my skills into backend development. Eager to embrace the collaborative nature of modern software engineering and aspire to learn and grow within a team oriented environment. With a proven ability to quickly grasp new concepts and technologies.

## Education

---

**B.Sc. Physical Science (UG) - Computer Studies, Electronics, Physics**  
*University of Kelaniya*

**G.C.E. Advance Level in physical science stream**  
*Kegalu Vidyalaya*

## Technical Skills

---

### Web Development

- HTML,CSS,JavaScript
- Wordpress
- Shopify

### Frameworks & Libraries

- React.js, Node.js, Express.js

### Databases

- MySQL, MongoDB

### Programming Languages

- C, Java, Python, Javascript

### Software Development Practices

- agile Methodology, SDLC
- OOP Principles

## Soft Skills

---

Problem-Solving

Time Management

Teamwork

Communication

Attention to Detail

Quick Learner

## Projects

---

### Thapro

- Thapro.lk 🌐 is a ecommerce website I built using the MERN stack as a personal project focusing on selling leather accessories. It features a dynamic product catalog, cart management, and a user friendly interface, showcasing my full-stack development skills.

- **Technologies: (Node.js, React.js, Express.js, Mongo dB)**

### **BookReviewApp**

A full-stack web application designed to let users share and explore book reviews. This app features user authentication, a dynamic review system, and a visually engaging interface built with modern frameworks. Developed to polish my full-stack development skills, the project demonstrates proficiency in building scalable RESTful APIs, secure authentication flows, and responsive front-end design.

**Technologies (MongoDb, React.js, Express.js,Node.js)**

### **Code.py '23**

Code.py ☑ '23 was a Python programming workshop for beginners. I joined as an instructor for this program

### **SpiceyCafe**

SpiceyCafe is a restaurant management system. It allows users to use the system based on their permission level.

**Technologies (Java, MySQL)**
